

Dear Patient,

We have the following policy guidelines to ensure that we perform the highest quality ultrasound exam that we can give to you and your baby:

*There is a limit of three visitors during all ultrasound exams.

*Due to the highly technical nature of your ultrasound, children under the age of 7 are invited into the room after the exam is completed. Please provide adult supervision during the exam.

*If you bring a CD (not DVD) we will download some images of your baby for safekeeping. We will also try our best to provide a 3D image along with other 2D images whenever possible.

*We do not allow videotaping of any kind during the exam; including cell phones.

Respectfully yours,

Women Gynecology & Childbirth Associates, P.C.
