The Mirena[®] Specialty Pharmacy Program

A simple new way to order Mirena

The Mirena Specialty Pharmacy Program (MSPP) frees medical practices from having to purchase and maintain an inventory of Mirena. All you have to do is submit a prescription request form.

The Mirena Support Center can assist you by dispensing Mirena and billing the medical insurer directly. The program will be administered entirely by CVS Caremark. Once you've submitted the prescription form, the acquisition and cost of the Mirena will not be your responsibility.

MSPP helps you and your staff focus on what matters most—caring for patients

- Eliminate your out-of-pocket expenses related to maintaining an inventory of Mirena
- Minimize uncertainty associated with insurance reimbursement
- Submit only your fees for clinical services, such as insertion, to insurance companies. No need to collect co-pays for the Mirena itself
- Spend less time on benefit verification. Your office only needs to verify insurance coverage for the insertion procedure, not the Mirena
- Simplify the ordering process by using only one Specialty Pharmacy prescription form for all payers

Add more certainty and simplicity to your practice—
order Mirena through MSPP
